Confirm the recipient and referral arrangement before faxing records. Use your organization's privacy procedures. Ordinary email and the website contact form are not for medical records.

01 **Identify the requested component**
Specify the prescribed tube or supply and its intended use. The current catalog is not a complete formula, pump or feeding-system service.

02 **Confirm system compatibility**
Have the clinical team verify tube size, connector type, syringe compatibility and any related administration equipment. Do not use appearance as a compatibility check.

03 **Prepare relevant clinical records**
Ask the payer and treating team which documentation supports the requested supply and ongoing need. Do not create a feeding or nutrition prescription from this checklist.

04 **Coordinate the existing service**
Identify the home infusion, nutrition, hospital or home health team already supplying equipment. Ask whether the requested item is bundled in an existing service.

05 **Confirm training and continuity**
Identify who provides caregiver instruction, replacement guidance and clinical follow up. Discuss discharge timing with the responsible team before promising a supply date.

Coverage checkpoint. Medicare describes enteral nutrition supplies and equipment within the prosthetic device benefit. The exact item and applicable clinical policy still require review.

Preparation aid only. This is not a prescription, signed order, authorization or coverage decision. MedraxDME is out of network; verify enrollment, plan participation and the dispensing arrangement. Follow the current payer requirements.
